

Direct Suspended Ceiling

DESIGN AND SPECIFICATIONS

Description

Decoustics Direct to Suspended Frame/Grid is an acoustical panel ceiling system. Panels are installed using a mechanical z-clip (slide and engage) method of fastening to a concealed metal suspension system.

For any given panel, a suspended ceiling will provide better acoustical absorption than if the panel is applied direct to a solid substrate e.g. gypsum board.

Panels

All Decoustics panels are custom fabricated and offered in a variety of types, sizes, geometric shapes, thicknesses and finishes.

Limitations

Essentially non-accessible. Progressive removal of panels is necessary to access the plenum space. However, limited localized access can be accommodated if desired.

Design Considerations

A 1" (25mm) wide perimeter reveal is required around all ceiling areas to facilitate installation of the z-clips. The reveal can be covered with an exposed crown or cornice type molding.

All lights, diffusers, speakers, smoke detectors, sprinklers, and similar items that penetrate or are located in the ceiling must be independently supported. The panel is not structurally capable of supporting the weight of any of these items.

When using speakers in ceiling or wall panels, it is recommended

the speaker grille be visibly mounted at the face of the panel. Speaker function creates air movement and any fabric covering the speaker will experience premature soiling.

Maintenance

Refer to appropriate Decoustics "Cleaning and Maintenance Instructions" for any specific finish.

Standards, Tests and Approvals

Surface Burning Characteristics (ASTM E-84): All panel components have a Flame Spread rating of less than 25.

Note: Building code requirements may necessitate composite panel testing based on specified finish.

A panel comprised of "Class A" (Flame Spread of 25 or less) components does not necessarily produce a composite panel meeting the "Class A" requirement. Decoustics has a considerable number of composite panel tests on file.

Decoustics Direct Suspended Ceiling

Performance Data

FINISH	EDGE OPTIONS	SIZES	CONSTRUCTION	THICKNESS	NRC	WEIGHT	COLOR
Fabric	Resin: - square - bevelled - radiused - stepped Aluminum: square edge with 1/8" - 3/16" (3mm - 5mm) defined joint or bevelled edge	Fabric: Up to 60" x 120" (1525mm x 3050mm) Finish width must be sufficient to cover panel, panel thickness, and wrap minimum 1" (25mm) on back side.	Panel consists of a 6 to 7 pcf (96 to 112 kg/ m ³) core. Fabric corners are fully tailored (no exposed darting). A 1 mil clear vapor barrier is adhered to panel back.	1" (25mm)	0.85	0.90 psf (4.40 kg/m ²)	As per finish selected.
				1-1/2" (38mm)	0.95	1.20 psf (5.90 kg/m ²)	
				2" (50mm)	1.10	1.52 psf (7.50 kg/m ²)	
Claro or Metallo	Aluminum: Coated square edge with 1/8" - 3/16" (3mm - 5mm) defined joint	Recommended: Up to 48" x 72" (1220mm x 1830mm) and 60" x 60" (1525mm x 1525mm). Handling larger panels may result in damage to panels. Consult Decoustics for larger panel sizes.	Panel consists of a 6 to 7 pcf (96 to 112 kg/ m ³) density acoustically absorptive core, with a special high acoustic performance layer laminated to face (1-1/16" (27mm) overall thickness) which is designed to receive a non- bridging acoustically transparent coating. A 1 mil clear vapor barrier is adhered to panel back.	1-1/16" (27mm)	0.85	1.05 psf (5.15 kg/m ²)	Claro Reflectance 90% Custom colors to match color chips
				1-9/16" (40mm)	0.90	1.40 psf (6.84 kg/m ²)	
				2-1/16" (52mm)	0.95	1.78 psf (8.70 kg/m ²)	
Quadrillo	Unfinished square kerf and spline, 3/32" (2.4mm) edge banding veneer and solid wood face frame. Custom edge profiling on request. Refer to Finishes section for additional acoustical data.	48" x 60" (1220mm x 1525mm).	Panel consists of a 6 to 7 pcf (96 to 112 kg/ m ³) density mat faced core laminated between a layer of 1/4" (6mm) thick Quadrillo face and a 1/8" (3mm) HDF perforated backing board (QPP). Internal fire treated particle board framing as required for edge conditions.	QPP-19 1-1/8" (28mm)	0.70	2.80 psf (13.68 kg/m ²)	Anigre Ash Beech Cherry Mahogany Maple Oak Paint Finish Pear Walnut Custom on request
				QPP-25 1-3/8" (35mm)	0.80	3.40 psf (16.61 kg/m ²)	
				QPP-50 2-3/8" (60mm)	1.00	5.5 psf (26.85 kg/m ²)	

Note: The information provided in this Data Sheet is accurate to the best of our knowledge at the time of printing. However, we reserve the right to make changes when necessary without further notification. Suggested applications may need to be modified to conform with local building codes and conditions. We cannot accept responsibility for products that are not used, or installed to our specifications. Please refer to our website for most current data.

Note: Only handle panels wearing clean, lightweight, white gloves during installation. Follow manufacturer's printed instructions for installation as well as field cutting of panels.

Mounting Methods

Mechanically mount direct to suspended metal frame/grid e.g. drywall furring channel or hat section with C channel. Install flat and level to +/- 1/16" (1.5mm) over an 8'-0" (2440mm) length.

Fit slide and engage z-clips (mounted on back of panels) into ceiling track runners or onto adjacent panels, depending on panel type, size and layout.

Allow for 1" (25mm) wide perimeter reveal.

To prevent building vibration from dislocating panels, install locking pins, outboard clips or similar devices at perimeter locations.

Installer to supply all suspension components including ceiling anchors, hanger wire or rods, ceiling track, metal furring frame or grid, moldings, and similar hardware. Ceiling track is available from Decoustics if required.

Follow manufacturer's printed instructions for installation as well as field cutting of panels.

Acoustical Data (ASTM C423: Type F5 Mounting as per ASTM E795).

FINISH	PANEL THICKNESS	FREQUENCY (Hz)						NRC	SAA
		125	250	500	1000	2000	4000
