

Gold Bond® Gridstone® Hi-Strength Ceiling Panels

09 56 13 / NGC

Technical Information
800.NATIONAL • 800.628.4662

DESCRIPTION

Gold Bond® Gridstone® Hi-Strength Ceiling Panels consist of a non-combustible high strength gypsum core formulated with increased uniformity and integrity which increases its sag resistance.

These panels can be used for interior and exterior ceiling applications in protected, well-ventilated spaces.

Gridstone panels are accepted by the USDA for use in food service and food processing areas.

BASIC USES

Applications

Use Gridstone Hi-Strength Ceiling Panels for interior and exterior ceiling applications in protected, well-ventilated spaces.

Gridstone Hi-Strength Ceiling Panels are accepted by the USDA for use in food service and food processing areas.

Gridstone Hi-Strength Ceiling Panels are ideal for interior and unexposed exterior ceiling applications, such as soffits, parking garages and other non-fire-rated ceiling systems.

Advantages

- Gridstone Hi-Strength 5/16" (7.9 mm) Ceiling Panels are 40% lighter in weight than standard gypsum ceiling panels.
- Gridstone Hi-Strength Ceiling Panels install easily in standard exposed grid systems.
- The durable white vinyl laminate eliminates additional finishing.
- Gridstone Hi-Strength Ceiling Panels' rigid gypsum core prevents sagging and warping problems and is backed by a 15-year limited warranty.
- Achieves UL GREENGUARD Gold Certification for low chemical emissions into indoor air during product usage. For more information, visit: ul.com/gg.
- Qualifies as a low-VOC emitting material by meeting California Specification 01350. For more information, visit: calrecycle.ca.gov/greenbuilding/specs/section01350.

INSTALLATION RECOMMENDATIONS

General

- Provide cross ventilation in unheated or enclosed space above ceiling panels.
- Install Gridstone Hi-Strength Ceiling Panels in lay-in suspension systems with edges concealed by flanges of suspension members.
- Gridstone Hi-Strength Ceiling Panels are designed to be mounted in standard 15/16" (24 mm) exposed tee grid systems or environmental-type grids for severe conditions, with grids either 24" (610 mm) x 24" (610 mm) or 24" (610 mm) x 48" (1,219 mm). Grid installation should be conducted according to manufacturer's specification.
- Vinyl laminate on face of Gridstone Hi-Strength Ceiling Panels is directional. Install with all factory edges parallel (same direction).
- Each panel must be continuously supported on all four edges.
- Cut panels to fit tightly at borders and penetrations so that cut edges are concealed by trim pieces and escutcheons.
- If panel cuts are required, seal exposed core with drywall primer to maintain performance of the system.

Cleaning: Remove common dirt and stains on the vinyl surface with mild soap or detergent in lukewarm water. Use a light scrubbing action with a cloth, sponge or soft brush. If the suitability of any cleaning agent is unknown, check its effect on the Gridstone Panel surface in a hidden area or on a scrap piece before attempting to remove a field stain.

Decoration

Gridstone Hi-Strength Ceiling Panels are factory finished decorative products that do not require painting. However, if desired, paint Gridstone with the following products:

1. Oil primer with finish coat of oil or latex paint.
2. Two coats of latex paint.

TECHNICAL DATA

Physical Properties		Gridstone Hi-Strength Ceiling Panels
Thickness ¹ , Nominal		5/16" (7.9 mm)
Width ¹ , Nominal		2' (610 mm), (Actual size is 23-3/4")
Length ¹ , Standard		GB 5020: 2' (610 mm), (Actual size is 23-3/4") GB 5010: 4' (1,219 mm), (Actual size is 47-3/4")
Weight, Nominal		1.24 lbs./sq. ft. (6.05 k/m ²)
Edges ¹		Square
Finish Face		2 mil. White Stipple Vinyl Laminate
Finish Back		N/A
Predecorated Gypsum Board ¹		Class 1
Ceiling Attenuation Class (CAC) ^{4,5}		41 dB
Light Reflectance ⁵		LR 1 (75% or greater)
Product Standard Compliance		ASTM C1396
Fire-Resistance Characteristics		
Core Type		N/A
UL Type Designation		N/A
Combustibility ²		Non-combustible Core
Surface Burning Characteristics ¹		Class A
Flame Spread ³		5
Smoke Development ³		0
Applicable Standards and References		
		ASTM C473 <i>Standard Test Methods for Physical Testing of Gypsum Panel Products</i>
		ASTM C840 <i>Standard Specification for Application and Finishing of Gypsum Board</i>
		ASTM C1396 <i>Standard Specification for Gypsum Board</i>
		ASTM E84 <i>Standard Test Method for Surface Burning Characteristics of Building Materials</i>
		ASTM E136 <i>Standard Test Method for Behavior of Materials in a Vertical Tube Furnace at 750°C</i>

LIMITATIONS

- Do not install panels in areas exposed to extreme or continuous moisture, such as saunas, steam rooms, gang showers and indoor pool enclosures.
- Do not exceed 104° F (40° C) or 90% relative humidity prior to, during and after installation.
- Gridstone Hi-Strength Ceiling Panels are not listed in fire-rated assemblies.
- For exterior application, protect grid panels from direct exposure to weather, water and continuous high humidity.
- Limit supported insulation to 1.6 psf (4.88 k/m²).
- Overlaid insulation may cause excessive panel deflection and is not recommended where high humidity is likely to occur.
- Extreme lighting conditions may distort texture appearance.
- Do not use strong organic solvents (such as ketones), harsh abrasive cleaners or steel wool. These materials may cause dulling, discoloration, softening and other permanent damage to the vinyl surface.

Handling and Project Conditions

- Avoid water exposure during shipping, handling, storage and installation, and after installation of gypsum ceiling panels in order to avoid the formation of mold or mildew.
- Remove nonbreathable shipping wrap material upon receiving and storing gypsum panels.
- Store gypsum ceiling panels off the ground and under cover. Use sufficient supports extending under the entire length of gypsum board to prevent sagging.
- Keep gypsum ceiling panels dry to minimize the potential for mold growth. Take adequate care while transporting, storing, applying and maintaining gypsum ceiling panels. For additional information, refer to the Gypsum Association publication, *Guidelines for Prevention of Mold Growth on Gypsum Board* (GA-238).
- Protect gypsum ceiling panels from the elements and maintain in good condition prior to and following installation. Stack panels flat, with care taken to prevent sagging or damage to edges, ends or surfaces.
- Do not install gypsum ceiling panels with visible signs of mold growth. Do not apply gypsum ceiling panels over other building materials where conditions exist that are favorable to mold growth.
- Do not exceed 95°F (35°C) when using a temporary heat source.
- Refer to GA-801 for complete handling and storage instructions.
