## SUSPENSION SYSTEMS

## PHYSICAL DATA

**Material**  
Aluminum – thickness 0.040"

**Surface Finish**

Painted: Factory-applied polyester paint  
Effects: Powder-coated, dye-sublimation, post-production  
Sequels™: Pre-coated coil

Custom colors also available.

Custom Sequels finishes are available for orders 10,000 SF or larger.

**Fire Performance**

Painted, Effects and Sequels finishes:  
Class A: ASTM E84. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

Painted aluminum finishes CAN/ULC S102 surface burning characteristics: Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

**Acoustical Options**

Perforated panels are supplied with a black fiberglass fleece to absorb sound.

**Recycled Content**

Up to 16%.

**Installation Considerations**

Ensure suspension is level and square, whether using existing or new suspension system.

### Design Considerations

Panel face sits 1" lower than the suspension system. Some light, sprinklers, and other components may need to be height-adjusted when retrofitting.  
Panels have a directional finish; follow direction arrows printed on the protective film.  
Anodized, Lacquer Mill, and pre-coat finishes may vary in shade between production runs as well as over time. Sizes can be mixed and matched on non-perforated panels only.  
Butt joint panels are recommended if the suspension system is not coordinated with the panel color.  
MetalWorks steel and aluminum panels are made at different manufacturing facilities that use different paint systems. Because of this, similar colors, i.e., White and Whitelume, are not exact color matches. Please consider this when designing adjacent spaces with multiple MetalWorks products.

On pre-coated finishes, clarity of image is best on flat surfaces. Pattern repeat may occur. Product is dye-lotted. Due to potential color variation, be certain to order sufficient initial quantities and attic stock.

### Seismic Restraint

MetalWorks Clip-on panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

### FAST134 Program Considerations

Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.

Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.

Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.

Stock vs Made-to-order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked) items will go through distribution and depend on distributor truck schedules.

### Warranty

One (1) Year Limited Warranty.  
Details at [armstrongceilings.com/warranty](http://armstrongceilings.com/warranty)

### Weight
